QEHS Manager

As a QEHS Manager, your responsibilities for ecological solutions will involve:

- Manage the QEHS department (including its budget), setting up the objectives of the team members, defining and rolling out the QEHS action plan, monitoring the QEHS KPIs
- Responsible for the compliance with the Singapore regulations including terms of licenses to operate
- Responsible for providing the necessary information in view of the Veolia EHS reporting
- Take part of the QEHS Veolia community, communicating and implementing Veolia Group standards within the HW business in Singapore (for instance, organise the Veolia Safety Week within the premises of HW plant)
- Responsible for maintaining the Integrated Management System (IMS) up-to-date and for the ISO certifications by interacting transversely and on a regular basis with the other HODs (including, update of SOPs & RAs, organisation of internal audits, follow up of IMS certification audits and any other related responsibility)
- Build a genuine relationship with the HODs in order to deploy in an effective way the safety policy of the company (including but not limited to the following: safety visits, incident reporting & root cause analysis, incident actions tracking, development of BBSO, identification of risks and particularly of High Potential situations)
- Develop a multifaceted and centralised environmental reporting, including CO2 and energy topics with the support of engineering team
- Responsible, together with the Fire Safety Manager (FSM) who is a member of the QEHS department, for the effective deployment of the Emergency Response Plan: submission and approval of the authorities, developing the emergency scenario, training strategy of the CERT, internal communication
- Responsible for the Process Hazard Analysis (PHA) studies carried out within HW business
- Participate in the WSH committee

The required criteria to fulfill these qualifications are:

- Degree in Process Safety / Chemical Engineering / QEHS / Environmental Engineering, WSQ Specialist Diploma in Workplace Safety and Health (SDWSH), or related fields
- Minimum 10 years of experience in chemical, refinery, pharmaceutical, power plant or green business;
- Having demonstrated leadership in conducting the change
- Experience in management, but also in transversal management
- High ethical standards at the workplace;
- Results oriented individual with robust process safety management abilities;
- Able to lead a cross-functional team to achieve departmental goal of lean production and operational excellence
- Have the necessary certifications, qualifications and accreditations to carry out this role effectively.
