## Maintenance Engineer (Mechanical)

As a Maintenance Engineer, your responsibilities for ecological solutions will involve:

- Plant day to day maintenance, planning, cost saving, documentation, manpower arrangement;
- Schedule the plant maintenance activities without affecting the client's operation;
- Liaise with the operation team for planned maintenance activities without affecting plant operation;
- Plant HSE;
- Prepare and submit the documents as per requirement (Daily, monthly and base on the requirement) for those reports;
- Ensure all the Maintenance data (PM schedule, budget) are correctly recorded and updated accordingly in the computerized system.
- Liaise with contractors for maintenance activities;
- Communicate with operations and contractors for HSE matters.
- Safety is a core value at Veolia, and a precondition for employment. You are expected to uphold the Veolia Always Safe rules and set an example to all colleagues in your daily work routine.
- Ethics and compliance are two areas where our rules and our standards are strictly non-negotiable. You are expected to stick to ethics and compliance rules and standards which ultimately mean doing your job properly and conducting our business like true professionals, whatever our missions and our place in the Group.

The required criteria to fulfill these qualifications are:

- Diploma/Degree in Mechanical Engineering
- Knowledge about those equipment and materials for industrial water/waste water treatment process
- Familiar with equipment PM programmes;
- Familiar with hazardous materials handling
- Microsoft office/Google workspace skills
- Know the good industrial practices on maintenance management/Asset management
- Have a good mindset about mechanical equipment management;
- Can work under pressure;
- Self-Driven
