## Senior/ Operations Technician (Industrial Water)

As a Operations Technician, your responsibilities for ecological solutions will involve:

- To have basic knowledge of wastewater treatment including pre-treatment, biological treatment, sludge separation and related applications in a wastewater treatment plant.
- Assist to develop, maintain and optimise all process documents including SOP, RA, training material, etc.
- Evaluate, report and/or troubleshoot any equipment or process problems that affect the operation target of the Plant.
- Support environmental compliance by monitoring all the plant inlet, operating and effluent data to ensure corrective action is taken when needed.
- Perform operational duties in the plant in accordance with SOP's and training including assisting with water sampling and analysis, loading, dosing, unloading and maintenance as required.
- Provides proactive support to the Engineer or Plant Manager to ensure the wastewater plant is operating to maintain safety, environmental, and operational priorities at the optimum production level.
- Perform calculations for determining process parameters, mass balance and material balances.
- Support any other site activities as delegated by the Engineer or Plant Manager.
- Safety is a core value at Veolia, and a pre-condition for employment. You are expected to uphold the Veolia Always Safe rules and set an example to all colleagues in your daily work routine.
- Ethics and compliance are two areas where our rules and our standards are strictly non-negotiable. You are expected to stick to ethics and compliance rules and standards which ultimately mean doing your job properly and conducting our business like true professionals, whatever our missions and our place in the Group.

The required criteria to fulfill these qualifications are:

- Possess a recognised Diploma or Vocational / National Technical Certificate (Nitec) in related Engineering
- Acquired at least 2 years of relevant experience in wastewater
- Possess analytical skills with experience in troubleshooting is a definite advantage
- Able to perform independently and work well with others
- Both day shift and 12 hours rotating shift pattern available
