Chemist

As a Chemist, your responsibilities for ecological solutions will involve:

- Establish sampling, analysis and segregation for incoming wastes and train lab technicians to work on it.
- Work closely with Logistics, Hazmat and Operations in handling incoming waste.
- Perform chemical analyses on waste materials using various analytical techniques such as GC, IC, XRF, TOC, ICP-OES etc.
- Maintain and calibrate analytical instruments, troubleshoot any issues, and keep accurate records of instrument maintenance and calibration.
- Utilize Laboratory Information Management System (LIMS) for sample tracking, data management, and quality control procedures.
- Ensure accuracy and completeness of data entry into the LIMS and generate reports as required.
- Ensure compliance with ISO requirements for laboratory procedures, documentation, and record-keeping.
- Draft and update standard operating procedures (SOPs) for laboratory processes and waste management practices.
- Work collaboratively with other team members to ensure the timely and accurate completion of tasks, including sample preparation, analysis, and reporting.
- Ensure good housekeeping in the laboratory.
- Participate in internal and external audits and inspections as required.
- Communicate effectively with other stakeholders to ensure compliance with regulatory requirements and customer expectations.
- Any other task assigned by a Senior Chemist / Lab Manager.
- Adhere to company policies and procedures, including health and safety requirements.
- Safety is a core value at Veolia and a precondition for employment. You are expected to uphold the Veolia Always Safe rules and set an example to all colleagues in your daily work routine.
- Ethics and compliance are two areas where our rules and our standards are strictly non-negotiable. You are expected to stick to ethics and compliance rules and standards which ultimately means doing your job properly and conducting our business like true professionals, whatever our missions and our place in the Group.

The required criteria to fulfill these qualifications are:

- Minimum diploma in chemical-related field with at least 3 years of laboratory experience.
- A degree in Chemistry related field with no working experience can also be considered.
- Good Analytical abilities and communication skills.
- Able to work independently.
- No colour blindness.

Don't miss this chance
