Veolia group is the global leader in optimized resource management. With over 171,000 employees worldwide, the Group designs and provides water, waste and energy management solutions which contribute to the sustainable development of communities and industries. With its three complementary business activities, Veolia helps to develop access to resources, preserve available resources, and to replenish them.

Through our comprehensive expertise, we are able to develop tailored services for governments, businesses and industries. Our one-stop customized solutions improve operational, financial and environmental performance, making Veolia a reliable partner in our clients' sustainable growth.

## Design Engineer

As an Engineer, you will be working with various stakeholders on assigned projects to formulate design requirements for various phases of the project. It can be during FEED, Pre-Tender Design, Construction stage or etc. The deliverable expected can be in the engineering report, drawing, calculation, study or etc. You will be part of a team that supports the Asia development and opportunity to be exposed to the very best around the region as part of your job nature. There will be times when project needed, you are expected to work outside the norm and occasionally travel (if required) to achieve the overall project objective. But you will be based in Singapore to support regionally.

### Job Description:

- Primarily perform all drafting activities for all trade and projects according to project requirements as when assigned at various stages of the project.
- Secondary perform engineering calculations and design.
- Understanding of applicable Engineering Standards, Plant and Equipment Layout.
- Assist formulation of design parameter and specification for inclusion in Tender Document together with key stakeholders.
- Verify contractor or vendor design submission comply to formulate design requirements.
- Setting up a design library for product standardisation and engineering documentation.

### Job Requirements:

- 2 to 3 years working experience in Engineering Design in construction or other related industries.
- Degree or Diploma Holder from a recognized institution, with preferably qualified in Electrical engineering or equivalent field.
- Require proficiency in AutoCAD, BIM and office software.
- A good team player that must be able to handle tasks independently, diligently and willingness to learn.
- Able to work in a fast-paced environment.
- Resilient, able to perform under pressure and can work both independently and in a team environment.
- Safety is a core value at Veolia, and a pre-condition for employment. You are expected to uphold the Veolia Always Safe rules and set an example to all colleagues in your daily work routine
