Veolia group aims to be the benchmark company for ecological transformation. With nearly 179,000 employees worldwide, the Group designs and provides game-changing solutions that are both useful and practical for water, waste and energy management. Through its three complementary business activities, Veolia helps to develop access to resources, preserve available resources, and replenish them.

We are able to develop tailored services for governments, businesses and industries with our comprehensive expertise. Our one-stop customized solutions improve operational, financial and environmental performance, making Veolia a reliable partner in our clients' sustainable growth.

## Design Engineer

As a Design Engineer, you will be working with various stakeholders on assigned projects to formulate design requirements at all stages of the project.

Based in Singapore, you will be part of a team that supports the implementation of construction projects throughout Asia. The ability to travel for short durations is important.

### Job Description:

- Understanding of applicable regional Country Code, Engineering Standards, Plant and Equipment Layout.
- Assist formulation of design parameter and specification for inclusion in Tender Document together with key stakeholders.
- Liaise closely with Project Lead on the review and approval of the consultant, contractor and vendor submission.
- Perform engineering calculations, design and drafting activities according to project requirements as when assigned at various stages of the project.
- Review and undertake all scope of work, specifications, documentation and drawing for all works, and be focal contact for the project.
- Verify contractor or vendor design submissions comply to formulate design requirements.
- Provide technical input and assistance in contract-related matters.
- Assist to lead setting up the design library for product standardisation and engineering documentation.
- Manages and improves existing standards and guidelines, implementing industry and company best practices.
- Additional duties as required
- Safety is a core value at Veolia, and a pre-condition for employment. You are expected to uphold the Veolia Always Safe rules and set an example to all colleagues in your daily work routine.
- Ethics and compliance are two areas where our rules and our standards are strictly non-negotiable. You are expected to stick to ethics and compliance rules and standards which ultimately mean doing your job properly and conducting our business like true professionals, whatever our missions and our place in the Group.

**Job Requirements:**

- Minimum 5-8 years relevant working experience in design and construction for Power Plant, Hazardous Waste Treatment Plant, large infrastructure project or other related industries.
- Engineering Degree from a recognized institution, preferably Mechanical or Civil field.
- Require proficiency in AutoCAD, BIM and office software.
- A good team player must be able to handle tasks independently, diligently and adapt to cultural differences.

Successful candidate will be working in the main office located at 15 Tuas View Circuit Singapore 636968. Company transport is provided.

Interested candidates are requested to submit application online or email full CV with photo stating current and expected salary, availability date, etc. to [sg.hr@veolia.com](mailto:sg.hr@veolia.com)
