

Press Release

Pasuruan - East Java, 9th of March 2023

**Veolia accelerates in circular economy with PlastiLoop,
the new worldwide offer for recycled plastics**

Veolia launches PlastiLoop Indonesia in Pasuruan, East Java

On March 9th, Veolia plastic recycling facility in Pasuruan - East Java, built in a partnership with bottled-water company Danone-AQUA became PlastiLoop Indonesia. This PlastiLoop Indonesia site helps reduce plastic waste in Indonesia, especially from single-use plastic bottles. It has a production capacity of 25,000 tons per year of food-grade recycled PET plastic (rPET).

This brand-new offer is made possible by Veolia's extensive network of experts and its 37 plastic recycling plants around the world. It provides its customers with a large variety of high-performance ready-to-use recycled resins: PET, PP, HDPE, PS, ABS, LDPE, and PC. These circular resins can be fed into production lines in multiple industrial sectors, including Packaging, Textiles, Agriculture, Home and Appliances, Automotive, Industrial and Logistics, Building and Construction.

Veolia's offer is customised to meet its customers' needs and can cover all or parts of the global plastics recycling value chain: waste collection, sorting, washing, compounding and production of ready-to-use circular polymers. These circular polymers allow clients to cut their environmental footprints with no compromise on product quality.

Estelle Brachlianoff, Chief Executive Officer of Veolia, comments: *"The new PlastiLoop offer brings together all our technical and commercial expertise in recycled plastics to provide our customers with the best possible support with customized solutions. It offers the strength of the Group, through its experts and its various recycling plants, to ensure the best access to recycled plastic deposits. Choosing recycled plastic not only saves resources but also achieves a considerable reduction in CO2 emissions, up to 75% less than virgin plastic. As a global champion of ecological transformation, through this offer, Veolia is creating more outlets for recycled material and promoting the structuring of this sector worldwide."*

Laurent Besson, General Manager, PlastiLoop Indonesia, comments: *More than ever, with PlastiLoop, Veolia strives to be the champion of ecological transformation. It is our ambition to change the plastic landscape in Indonesia in active collaboration with all stakeholders.*

Veolia and plastics recycling

Veolia and plastics recycling Global leader in plastics recycling with 37 plants worldwide, Veolia produced about 476,000 metric tons of circular polymers in 2021 and has increased its global recycling capacity fivefold since 2016. It aims to reach 610,000 metric tons of recycled resins delivered by 2023.

About Veolia

Veolia group aims to be the benchmark company for ecological transformation. In 2022, with nearly 220,000 employees worldwide, the Group designs and provides game-changing solutions that are both useful and practical for water, waste and energy management. Through its three complementary business activities, Veolia helps to develop access to resources, preserve available resources, and replenish them. In 2021, the Veolia group supplied 79 million people with drinking water and 61 million people with wastewater service, produced nearly 48 million megawatt hours of energy and treated 48 million metric tons of waste. Veolia Environnement (Paris Euronext: VIE) generated consolidated revenue of €28.508 billion in 2021. www.veolia.com
